THE Y

Y Trailer

Simple - Light - Strong

THE YTRAILER

This adaptable trailer can carry anything, anywhere. Simple, light and strong the Y combines innovative design with sturdy construction to produce the best bike load trailer you can buy.

Y LARGE

20 inch wheels
27.5 x 19.7 inch (700 x 500 mm) load bed
200 lbs (90 kg) load capacity
15.4 lbs (7,5 kg) actual weight

Y SMALL

16 inch wheels
22.8 x 15 inch (600 x 400 mm) load bed
100 lbs (45 kg) load capacity
13.2 lbs (6,5 kg) actual weight

THE TRAILER

The simple aluminium frame is light but incredibly strong. Many luggage options can be easily attached to the plywood load bed. Add to this the benefits of easy storage (the wheels and handle 'Quick-release' in seconds), and you have one of the most affordable, versatile trailers on the market today. The simple but efficient hitch allows fast and secure attachment to your bike.

CHOOSE A TOP

Use the trailer as standard with its tie down straps and load bed, or fit a bag or box to suit your purpose. Many commercially available bags and boxes will bolt or strap onto the trailer, we have selected the following for their quality:

1. New Carry Freedom carry-on bag that fits the Y small perfectly. Made by UPSO.
2. New Carry Freedom barrel bag in two sizes for Y small and large. Made by UPSO.
3. Folding plastic box with lid: Y small size - 60 x 40 cm, Y large size - 70 x 50 cm.
4. Lockable aluminium boxes

5. Surfboard carrier: the Y-Surf sits on a Y large and can carry boards, ladders, timber or even a cello.

USES

Modern mobility is moving away from cars. Sensible use of resources will be critical to the planet surviving. We think an E Bike with a trailer is the best way to be more "Car Free" in the future. Commute with a change of clothes in your waterproof bag, carry your groceries with the fold flat box, tour the world with the lockable aluminium box, or transport your boards and long stuff on the Y-Surf carrier. Whether carrying everyday loads or planning something unique, we can help.

ACCESSORIES

To carry what you demand we can make the Y longer or even wider. We can supply an adaptor allowing you make a 4 wheel trailer by linking two Y trailers one behind the other. Our hand cart adaptor allows you to walk the trailer with minimal effort. Long arms are available for towing kayaks and surfboards. A wide axle beam can give you extra width for that extra special load. Extra hitches can be fitted to other bikes so that your trailer is can be used by family or friends.

CONSTRUCTION

The finish is excellent; anodized 6064T6 aluminium welded to the highest quality standards by our ISO 9000 factory. Quality tires, with Kevlar armour, run on lightweight 20 spoke wheels fitted with sealed cartridge bearings. These wheels are attached by sturdy button release 12 mm wheelchair stub axles.

SAFETY FIRST

The Y trailer has been tested by the German testing authority velotec.de and conforms to the European DIN EN 15198 for bicycle load trailers.

REMEMBER!

A lot of commonsense should be used when carrying loads. Be aware, be safe and have fun!

CARRY FREEDOM AND USED

The Y is just one model in the Carry Freedom trailer range. We create innovative high quality solutions tailored for people living in the real world.

We reduce our impact on the environment by minimizing our use of resources such as paper and power, and recycling what we can. Our suppliers have a commitment to the environment and by supporting charities that promote environmental awareness we help educate people on better ways to live.

Our office and warehouse in Germany, makes 60% more electricity than it uses. The excess is pushed back in to the grid system for others to use. This electricity is made using photovoltaic panels. We heat using wood pellets which use a low water temperature to power the heating system reducing our carbon footprint even more.

USED is owner of the Carry Freedom brand and it's philosophy is very clear: The only good product, is a product that is being USED. Everything else is a waste of resources, time and of course money. We want to sell products that people need. "If you don't need it, don't buy it." That's the message.
