THE **Y**

THE Y

The Y trailer combines innovative design with state-of-the-art construction to produce one of the most flexible bike trailers you can buy.

The simple aluminium frame, although very light, is incredibly strong.

The adaptable load bed allows for numerous possibilities. Durable folding boxes, heavy-duty waterproof bags and lockable aluminum boxes are our three standard options,

but this versatile trailer will accept a wide range of commercial containers.

The Y also comes with a range of options to make life easier.

Hand cart handles or longer tow arms increase the flexibility

of use. Add to this the benefits of easy storage (the wheels and handle "Quick-release" in seconds),

what you have is one of the most affordable, versatile trailers on the market today.

Y choose any other?

Y small: small but perfectly formed, the 45 kg load capacity makes light work of even the heaviest load

Y large: this big beauty, with its huge 90 kg load capacity, makes life more "car-free" than before

Carry surfboards, kayaks, dogs, beer, beds, shopping, flowers, lawnmowers, film cameras, folded bikes, suitcases & lots more
